

Design options

Ideas and imagination are highly appreciated at Rationel. Whether the creative ideas come from you, the architect or the carpenter, they should not be stopped by standard solutions. We produce special units for both refurbishment and new build projects. Here you can see a few examples of customised solutions. Visit rationel.co.uk and be inspired.

Colours

Colour is one of the easiest and most effective ways to make a window or door unique and give it the character you require. Rationel offers a standard range of colours as shown below, however virtually any colour you specify from a RAL chart can be achieved in addition to traditional timber stains.

The colours shown are an indication of our finishes but are not accurate colour reproductions. Please check with an authorized RAL colour chart.

Rationel Distributor Building With Frames

Based in Truro Cornwall, Building With Frames, specialists in pre engineered energy efficient homes and super insulated Garden structures, are an official distributor of Rationel Windows and Doors. With the wide range of stylish performance products available, complimenting almost any build or architectural style, BWF can achieve the high level of super efficiency required by our clients. Details of projects undertaken using Rationel windows and doors from Garden Boxes to complete homes, can be seen on our web site. There is also a link to view their full product range.

To find out more about Building with Frames and Building with Boxes visit our web sites www.buildingwithframes.co.uk or www.buildingwithboxes.co.uk or call our office on 01872 273757.

WINDOWS & DOORS

Timber windows and doors

DOMUS, PATUS and AURA are windows and doors made of timber. They are especially for those who appreciate natural timber both inside and out. They can be delivered in both standard and bespoke sizes and shapes - without any additional costs, and they come in many colours and styles.

Timber/composite windows and doors

Rational offers several ranges for those who love natural timber indoors and easy maintenance outdoors. Timber is the predominant material, with an external aluminium cladding.

PATUS® energy efficient windows and doors in timber for classic houses are an ideal solution for older buildings. Or for new buildings, if a classic expression is desired.

PATUS+® energy efficient windows and doors in timber with external aluminium cladding.

The aluminium cladding provides additional protection against the climate and ensures a minimum of maintenance.

DOMUS® energy efficient windows in timber for modern buildings and refurbishment of 30-50 year old buildings.

With simple profiles and easy to join. Ideal for sun lounges and bays.

ALDUS® energy efficient windows and doors in timber with external aluminium cladding.

Suitable for low energy buildings such as passive houses. The picture is from a retrofit passive house with ALDUS windows and doors

AURA® is a prize winning timber window and door range. Slim design and optimum incidence of light.

AURA is designed for modern energy efficient buildings.

Rational AURAPLUS™ is a prize winning range of windows and doors in timber with external aluminium cladding. Slim design and optimum incidence of light.

Rational AURAPLUS is designed for modern energy efficient buildings.
